Stowk

Description:

As a Front end Web Developer Intern you will join a world class team in building innovative technology solutions for Stowk. This role will challenge you to shape the user experience, internal processes, and eventual customer satisfaction.

Responsibilities:

• Create the front end of highly interactive websites using modern UI frameworks (Angular, Typescript, JavaScript, HTML5 and CSS3)
• Work with different teams and follow Agile development processes
• Drive and own the implementation of the front end user experience
• Design, develop code and integrate with API's

Qualifications:
• Experience in JavaScript, HTML5, CSS3, JSON
• Experience with modern UI frameworks (e.g. AngularJS, React)
• Experience interfacing with API's.
• Experience with React Native, Redux, NodeJS, GraphQL, and MongoDB a major plus.
• Experience with algorithms, geo location, real-time data a major plus.
• Experience in a modern build environment on a large-scale development project
• Solid knowledge of Object Oriented Design
• Familiarity with Automation Tools and Test-Driven Development
