BCC Course - New	MATH	230	Elementary and Intermediate Algebra for Business or STEM majors	Spring 2018	6	6 hours lecture	(GR)	Prerequisites: MATH 225, 250, 253, or appropriate placement through the multiple measures assessment process.	A combined course in algebra: Systems of equations: inequalities, graphs and functions; radicals, quadratic polynomials, rational expressions; exponential and logarithmic functions, and problem solving, with emphasis on knowledge skills appropriate for students pursuing a major in STEM (Science, Technology, Engineering, Mathematics) or Business.	1701.00	This course will allow students to complete their math requirements in fewer semesters. We just received a large grant in order to create an accelerated pathway to College Level Mathematics (the Transformation Grant, see attached files). About 62% of all incoming students to PCCD are deemed in need of math remediation and only about 17% of students who start in remediation ever complete a degree or certificate. Additionally only about 11% of students beginning in remediation complete a transfer level math course. By removing one course at the remedial level, we intend to increase the number of students who complete degrees/certificates/transfer level math that entered Laney at that level.	New course. CC Date: 12/15/2016	DE	Approved
BCC Course - New	PHYS	004C	General Physics with Calculus	Spring 2018	5	4 hours lecture, 3 hours laboratory	(GR)	Prerequisites: MATH 3C and PHYS 4B	Comprehensive study of major topics of physics: Light, interference, relativity, quantum physics, atoms, molecules, and nuclei.		Physics 4C is the third semester of a three semester sequence that provides a comprehensive survey of the major topics of physics for students majoring in engineering or the physical sciences.	New course. Consulted with COA, Laney, and Merritt. Note: Course has already been Board approved in the past, but BCC decided not to submit it to the state. We are resubmitting for a more recent Board date. CC Date: 12/15/2016		Approved
