| BCC New Course | CIS | 211 | Exploring Robotics | Fall 2015 |  | 1 hour lecture, 3 hours laboratory | $\begin{aligned} & \text { (GR or } \\ & \text { P/NP) } \end{aligned}$ |  | Introduction to robotics and computing: Modeling, designing, planning, and programming; hands-on robotic projects using motors and sensors. | 0706.00 | Robotics is a fast growing field with a wide range of applications. This course aims to provide hands-on introduction to the world of computer science, engineering and mathematics. Robotics can help teach design, innovation, problem solving, and teamwork within the context of math, science, and technology, and put academic concepts in context. It is a course to explore the feasibility of an engineering program combined with mathematics, computer sciences, and physics. | New course | Approved |

| Berkeley City College | BCC New Program | Chemistry | Associat e in Science | Fall 2015 | $\begin{aligned} & 0954 . \\ & 00 \end{aligned}$ | Chemistry is essential and pre-requisite for many science majors, including medical, dental, and pharmacy programs. At Berkeley City College we offer courses designed to prepare students for transfer to four year colleges or universities to major in various fields of biological and physical sciences, as well as to prepare them for professional careers in health care (such as medicine, dentistry, nursing, dental hygiene, physical therapy, and pharmacy). The Science Department at Berkeley City College is offering an Associate in Science Degree Program in Chemistry. This is a two-year (four-semester) course sequence that allows students to start in either the fall or spring semester. This program will prepare students into the right pathways for their majors at the 4 -year colleges or universities. At the same time it will provide students with the analytical skills needed to enable them to work as entry level technicians in academic and research laboratories. | Approved |
