3. BCC proposed to change the SAM Codes for three courses (BUS 5, 10, 56), which are courses that are also offered in the other colleges. The following were discussed:
    a. The initial issue was that PeopleSoft could only take one SAM Code for common courses offered at different colleges. A. ElMasry reported finding a solution to the issue and we are now able to enter different SAM Codes for a course that is offered at different colleges.
    b. The question was raised as to the appropriateness of having different SAM Codes for a course that is offered at different colleges and should it be a districtwide change. It was noted that SAM Code determines the place of a course in a program and since we offer different programs, a course at BCC can be placed differently at their program than how that same course is placed at a different program at Merritt, so SAM Codes can be different.
    c. Another point of contention was the definition of "B = possibly occupational" courses. Should all introductory courses be placed in that category and should this be uniform districtwide? A. ElMasry sent an inquiry to the State Chancellor's Office.
4. Proposal to include Financial Aid Advisor in the college curriculum committee
