The Berkeley City College Biotechnology Program invites you to the
Spring 2017 Science Seminar Series

Tackling Toxics: For Healthier Products, People and Planet

Arlene Blum, Ph. D.

Monday, May 1, at 7 pm, Room 431

Arlene Blum, biophysical chemist, author, and mountaineer is a Visiting Scholar in Chemistry at the University of California, Berkeley and executive director of the Green Science Policy Institute. The Institute brings government, industry, scientists and citizens groups together worldwide to support chemical policies to protect human health and the global environment. Their research and policy work has contributed to stopping the use harmful chemicals in children's sleepwear, furniture, electronics and other products globally.

Sponsored by the California Institute for Regenerative Medicine

The Peralta Colleges: Berkeley City College, College of Alameda, Laney College and Merritt College
