## How much progress has the Academic Senate Committee made towards its GOALS this year?

### Describe the Academic Senate Committee's strengths.

Strong advocates for faculty and 10+1

Regular attendance of all voting members. Timely release of agenda and supporting documents, respect for contributions from all visiting presenters and each other.

attendance, collegiality, task-driven

### Describe the Academic Senate Committee's opportunities for growth:

I think there is an opportunity to grow in terms of discussion and action planning. Sometimes our meetings are weighted towards "report outs" or "road shows" with not enough time for discussion or deliberation

Could focus a little more. Some discussions seem to be over lengthy and unnecessary to reach consensus.

Continue to educate all faculty at the college about the role and importance of the Academic Senate and to encourage more to participate. Encourage tenure-track faculty to participate on committees as voting members or to simply attend them to learn.

I know we have to follow protocols but things feel very slow moving sometimes. And oftentimes to me resolutions don't always lead to action
